

Job Title: Production Superintendent – Appalachian Region

Department: Operations

Reports To: SVP, Appalachian Regional manager

Location: State College, PA

Supervise the Appalachian Region’s daily production activities. Supervise well tender/operators in day-to-day surveillance in maximizing production while minimizing lease operating expenses. Review daily well productions with operators and decide what actions are necessary to maintain smooth well operations. Coordinate data gathering and input from handhelds used by operators in the day-to-day surveillance. Provide productions and LOE forecasts to Regional Manager for budgeting purposes. Coordinate installation of all production equipment, pipeline tie-ins and compressor stations necessary for well production and sales purposes.

Education/Qualifications:

1. High School diploma required; Bachelor’s degree preferred.
2. Working knowledge of well, pipeline and compressor operations.
3. 10+ years of well operations experience focused on gas wells and all related equipment.

Requirements/Skills:

1. Basic computer skills, including experience with Microsoft Office.
2. Valid driver’s license with ability to travel, as necessary, to field operations throughout Pennsylvania.
